

Keeping you connected

Make sure you have a seamless connection to the internet with a solution that is fit for your business. Whether you need a super speedy broadband connection, or direct internet access so you don't have to share your bandwidth, we have a solution.

The average UK broadband speed is 46.2Mbps*

*Ofcom 2018 study

Connection type	Who needs this?	What's the benefit?
Standard broadband	Internet useful Ideal for a small business with a small amount of staff relying on emails and internet connection.	Cost effective, internet access with download speeds of up to 17Mbps.
Fibre broadband	Internet essential Perfect for a business that relies on uploading and downloading large files or media.	Faster speeds for higher productivity and efficiency with download speeds up to 76Mbps.
Fibre access	Internet crucial For businesses that need their own dedicated fibre access.	Uncontended internet access with your own contained bandwidth. Download speeds up to 20Mbps.
Ethernet first mile	Internet critical A business that relies on an online presence and uses cloud-based applications.	Dedicated access allows you to transfer vast amounts of data with dedicated download speeds up to 35Mbps.
Ethernet fibre	Scalable internet critical Ideal for large organisations with remote workers and cloud-based applications.	Robust, dedicated and scalable with dedicated download speeds of up to 1000Mbps.
